PROJECTS

Django Blog App

Dynamic blog application built with Django

- Implemented features like blog creation, management, and user authentication.
- Designed and managed database models for posts, categories, and comments.
- Built CRUD functionality with clean URL routing and responsive templates.

Personal Portfolio

Responsive portfolio website built with React.js

- Built reusable React components to showcase projects, technical skills, certifications, and contact information.
- Integrated project links, GitHub repositories, resume download, and social media profiles.
- Deployed the application on Netlify with version control using Git and GitHub.

Text Utils Web App

Text manipulation web application built with React.js

- Configured text conversion, case transformation, and whitespace removal features.
- Added word count, character count, and reading time estimation.
- Enhanced usability with a responsive interface and light/dark mode support.
